

Single layer

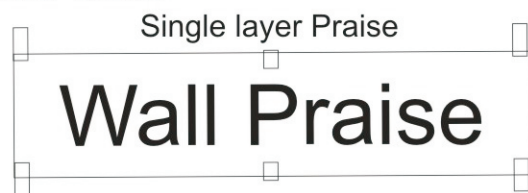

For video tutorials and slideshows on Wall Praise application, go to www.wallpraise.com
Under the PRAISE button, select [application instructions](#)
Below we show you the center appl method.

Application-Single Layer

Your Praise is a three layer strip- pre-spaced and ready to go on the wall. It will generally come to you in a roll- lay the Praise out on a flat surface and allow the creases and bubbles to settle out from the shipping tubing. Gently rub it on both sides with your App. Tool- or a Credit or Bank Card.

First on the back-looks like graph paper, and then on the mask tape side. This ensures the Praise to stick to the masking tape part of the Praise.

Clean and dry your surface-don't use harsh chemicals-just soap and water.

Still laying on flat surface, place masking tape at each corner. Place on wall-use level along bottom of lettering, place and step back to check if it looks straight.

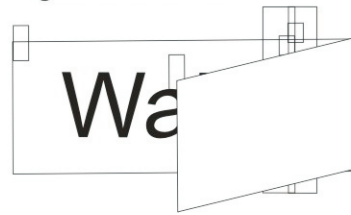

Add 2 more rows of tape across the Center of your Praise.

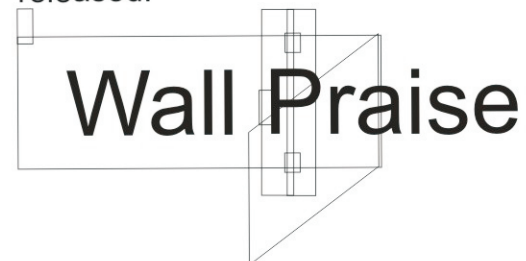

Rub one more time over Praise with your application tool.

Rub one more time over your Praise, paying careful attention to the edges of your lettering .Your tape will act as a hinge

Flip your Praise to the left place against the wall.

Slowly start to peel off checked backing of your Praise, rolling it off as we show you online-checking that the vinyl Praise is completely adhered to the sticky tape layer You can put another small piece of tape on the edge of the layer you are folding over to help keep it in place. Tear or cut off backing paper when released. You can put another small piece of tape on the edge of the layer you are folding over to help keep it in place. Tear or cut off backing paper when released.

Place Praise back in place on right side, wall-working from the center out. Rub all letters well on wall. *Repeat for other side.*

Roll off the mask tape as we show you in the application instructions online. Wall Praise sticks well to most flat surfaces. Be patient, especially with small letters, and again, make sure to watch the online videos as they will help you understand the importance of working slowly.

The results will be fabulous!

Below we show you the center appl method..

Application-Multi Layer

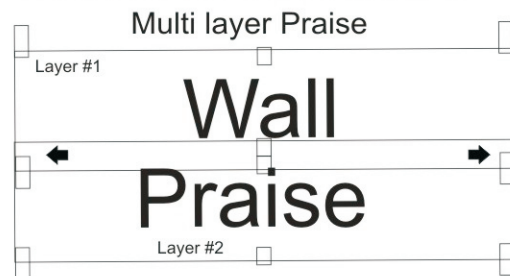

Your Praise is a three layer strip-pre-spaced and ready to go on the wall. It will generally come to you in a roll-lay the Praise out on a flat surface and allow the creases and bubbles to settle out from the shipping tubing. Gently rub it on both sides with your App. Tool- or a Credit or Bank Card.

First on the back-looks like graph paper, and then on the mask tape side. This ensures the Praise to stick to the masking tape part of the Praise.

Clean and dry your surface-don't use harsh chemicals-just soap and water. Don't use water at all unless dirty or greasy.

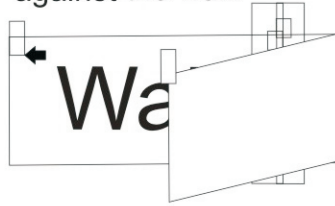

Still laying on flat surface, place masking tape at each corner. Place on wall start with Layer #1, then 2, etc. Use level along bottom of lettering, place overlapping alignment arrows and step back to check if it looks straight.

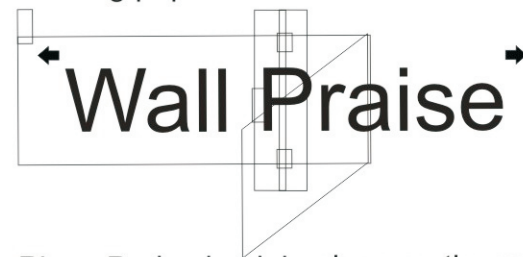

If everything looks straight, remove other layers and place back on flat surface, leaving only #1. Add 2 more rows of tape up the center of Layer #1

Rub one more time over your Praise, paying careful attention to the edges of your lettering. Your tape will act as a hinge. Flip your Praise to the left place against the wall.

Slowly start to peel off checked backing of your Praise, rolling it off as we show you online-checking that the vinyl Praise is completely adhered to the sticky tape layer. You can put another small piece of tape on the edge of the layer you are folding over to help keep it in place. Tear or cut off backing paper when released.

Place Praise back in place on the wall working from the center out. Rub all letters well on wall, again paying careful attention to the thinner letter's edges. Start to remove the tape layer. If you have a hard time getting it to stick be patient. Some of the finer Wall Praise are harder to apply but are worth it when you see the finished product!

Align your arrows on the second Praise and Repeat for other side.

Roll off the mask tape as we show you in the application instructions online. Wall Praise sticks well to most flat surfaces. Be patient, especially with small letters, and again, make sure to watch the online videos as they will help you understand the importance of working slowly. The results will be fabulous!
